MANUFACTURED HOME NOTES

- Permits are required before most work begins; the county runs online permit application and search through its WATS web portal.
- Mobile/manufactured home zoning and placement in the unincorporated county are governed by the St. Johns County Land Development Code (posted at [sjcfl.us/land-development-code/](https://www.sjcfl.us/land-development-code/)).

Florida: installations follow FS 320 and Rule 15C-1/15C-2 (DHSMV) with licensed installers and installation decals; county building permits, tie-down and wind-zone compliance apply. Coastal counties may require Wind Zone II/III homes.

PIER

Show each pier and anchor location, with maximum spacing and distance from end walls, as required in the Manufacturer's Specifications. Any special pier footing required (over 16 x 16 inches) shall be noted separately with required dimensions per the manufacturer's specifications. To determine footing size and spacing, a maximum soil bearing capacity of 1,000 lbs/sq. ft. shall be used. Pier footings to be poured-in-place, whether required by Ordinance 92-13, manufacturer's specifications or by preference, must be inspected by the Building Division prior to pouring.

To the best of my knowledge, the information provided hereon, and the manufacturer's specifications provided herewith, represent the latest information available from the manufacturer for the home identified above.
